

» To the Financial Director or the Director of IT Department

Reduce of power consumption costs is possible thanks to effective power-saving modes of office equipment. We offer the “OffMon” software that maximizes effective usage of power-saving mode of monitor. This software switches off monitor as soon as computer is locked or instead of screen saver being started.

Economic benefits of the program are in a table below. Usual monitor with a capacity of 50W, 251 business days in a year, 1 kWh priced at \$0.11 USD are taken into consideration. Total time of monitor delay for 1 business day is equal to 100 minutes.

Economy table

Number of employees	Electricity cost saved per month	Electricity cost saved per year	Payback period
100	\$20 USD	\$221 USD	1 year
200	\$40 USD	\$443 USD	6 months
300	\$60 USD	\$665 USD	4 months
500	\$100 USD	\$1109 USD	2 months
1000	\$201 USD	\$2218 USD	1 months
More than 1000	More than \$300 USD	More than \$3000 USD	Less then 1 month

At customer’s request it is possible to make custom build with predefined settings required by your company.

Unlimited Computer License costs \$249.90 USD (the offer is up to April of 2009).

Additional information about this program is available at <http://offmon.wholegroup.com>.
